

Fabricio Tramontano Pirini

SENIOR FRONTEND ENGINEER - GROWTH & EXPERIMENTATION

Brazil (UTC -3)

✉ fabricio@fabriciopirini.com 🌐 fabriciopirini.com 📄 fabriciopirini 📁 fabriciopirini

Senior frontend engineer with 9+ years building high-performance React and Next.js applications across fintech, e-commerce, and experimentation focused teams. Specialized in growth engineering, A/B testing platforms, analytics instrumentation, and performance optimization. Experienced working remotely across Brazil, Europe, and US-based organizations.

Technical Skills

Languages & Runtimes: TypeScript, JavaScript (ES2024+), HTML5, CSS3, Node.js

Frameworks & UI: React, Next.js, Redux Toolkit, Tailwind CSS, Radix UI

Analytics & Experimentation: Segment, Mixpanel, Growthbook, LaunchDarkly, Unleash, StatSig

Testing & Quality: Playwright, Vitest, Jest, React Testing Library, Storybook

Tooling & DevOps: Docker, CI/CD (GitHub Actions), GraphQL, Figma, Power BI

Professional Experience

Leading Cryptocurrency Exchange Platform - US Client

Brazil (Remote)

CONTRACTOR - FRONTEND ENGINEER

Nov. 2024 - Present

- Set up Segment tracking for the Support Center portal across web and 3 React Native apps, instrumenting experiment touchpoints to measure feature adoption and retention signal.
- Cut visual regression test runtime from 12 min to under a minute by building the Playwright VRT infrastructure from scratch. Coverage tripled across the component library.
- Built 15+ dynamic financial data tables with search, deep-linking, copy, and i18n support.
- Fixed 25+ accessibility issues platform-wide: keyboard navigation, focus management, and ARIA attributes.

Norsk Gjenvinning

Norway (Remote)

LEAD SOFTWARE ENGINEER & TECH LEAD

Sep. 2023 - Sep. 2024

- Managed 5 engineers across 2 time zones. Built the sprint cadence, code review process, and CI/CD setup from scratch.
- Shipped 5 storefronts with React, TypeScript, and Next.js. Built a shared component library adopted by 3 product teams.

LEAD FRONTEND ENGINEER

Sep. 2022 - Aug. 2023

- Set up Google Analytics and SEO tooling from scratch for Norwegian client properties, including Norsk Gjenvinning, one of Norway's largest recycling companies.
- Got Core Web Vitals into the green on key checkout routes (LCP under 2s) through code splitting, lazy loading, and edge caching.

- Integrated 5 storefronts with Sanity CMS, giving the content team full control over brand-aligned pages without engineering involvement.
- Led WCAG 2.0 AA compliance across e-commerce storefronts and brand landing pages for a portfolio of 70+ European companies.

Oda

Norway

SOFTWARE ENGINEER

Aug. 2020 - Aug. 2022

- Built the A/B experimentation program from scratch, the company's first, while also owning the platform it ran on. Ran 2 to 4 live experiments per month through a 2x headcount growth.
- Ran a hero-removal experiment expecting higher conversion. It dropped. The introductory layer was providing context users needed to commit. Killed the variant on data, not instinct.
- Shipped a stripped onboarding flow (stepper + logo only, minimum data per step) with lead capture for out-of-coverage users. Conversion increased by 15%.
- Removed hard-coded locale configurations blocking international expansion. Finland and Germany launched without engineering changes to the core platform.
- Picked by the Chief Growth Officer (ex-VP Growth, Skyscanner) for an internal growth program cohort after standing out at a company-wide growth workshop.

Sportradar

Norway

FULL STACK ENGINEER

Sept. 2018 - Aug. 2020

- Refactored web crawlers and scrapers into 5 independent microservices, cutting runtime by 120x and resource usage by 10x.
- Migrated CI/CD from Jenkins to GitLab, reducing deploy failures by 85% through Docker containerization and pipeline redesign.

Samsung R&D Center

Campinas, Brazil

SOFTWARE ENGINEERING INTERN

Jan. 2017 - Jan. 2018

- Built a WCAG 2.0 AA Web Accessibility portal and automated internal reporting dashboards with Power BI.
- Contributed to IoT prototype R&D and gave talks on Web Accessibility at 2 industry conferences.

Education

Universidade Federal de Itajuba - UNIFEI

Itabira, Brazil

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING

2011 - 2018

University of Toronto

Toronto, Canada

EXCHANGE STUDENT, ELECTRICAL AND COMPUTER ENGINEERING

2013 - 2014
